YASH PANDEY

B.Tech CSE (AI & ML) Student | Aspiring ML Engineer

Roorkee, Uttarakhand | 9548557172 | yashpan9548@gmail.com | LinkedIn | GitHub

SUMMARY

Computer Science undergraduate specializing in AI & Machine Learning, with hands-on experience building and deploying machine learning applications, analyzing data, and developing full-stack business software. Interested in ML engineering, data analytics, and practical software solutions.

EDUCATION

Quantum University — B.Tech, Computer Science and Engineering (AI & ML) | August 2024 – August 2028
Relevant Coursework: Data Structures and Algorithms, DBMS, Object-Oriented Programming, Statistics, Machine Learning.

TECHNICAL SKILLS

Programming: Python, C++, SQL, Java, C **Data:** Pandas, NumPy, Matplotlib, Seaborn, Excel, Power BI
Machine Learning: Scikit-learn, EDA, data cleaning, preprocessing, feature engineering, classification, regression, cross-validation, model evaluation, hyperparameter tuning
Backend & Databases: FastAPI, REST APIs, Pydantic, MySQL **Tools:** Git, GitHub, Jupyter Notebook, VS Code, Docker, AWS

PROJECTS

Student Placement Prediction System | Python, Pandas, NumPy, Scikit-learn, FastAPI, Joblib

- Built a model to predict student placement outcomes using academic and demographic features; performed preprocessing, feature engineering, and categorical encoding.
- Compared Logistic Regression and Random Forest; achieved approximately 85.84% accuracy with Logistic Regression and exposed predictions through a FastAPI REST API.

Silver Business Management System | React, FastAPI, MySQL, Docker, AWS, JWT

- Developed a business application for managing inventory, sales, purchases, and payments, integrating a React frontend with FastAPI services.
- Implemented MySQL persistence and JWT authentication; deployed the application using Docker and AWS infrastructure.

Customer Churn Prediction | Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn

- Ongoing project analyzing customer behavior to identify churn patterns through EDA, data preprocessing, and feature engineering.
- Building and comparing classification models to evaluate churn prediction and derive customer-retention insights.

BMW Sales Executive Dashboard | Power BI

- Created an interactive dashboard using BMW sales data (2010–2024), with KPI cards and filters to analyze sales volume, fuel-type distribution, and regional performance.

PROBLEM SOLVING

Practicing Data Structures and Algorithms in C++; topics include arrays, strings, linked lists, stacks, queues, trees, graphs, recursion, backtracking, dynamic programming, sorting, searching, and hashing.

LANGUAGES

English, Hindi
